You need the following

- NetBeans 8.1

You need the following

- NetBeans 8.1
- JavaFX Scene Builder 2.0

You need the following

- NetBeans 8.1
- JavaFX Scene Builder 2.0
- JDK 1.8

Integrate Scene Builder 2.0 into NetBeans

Windows

Tools/Options/Java/JavaFX/

Mac OS X

NetBeans/Preferences/Java/JavaFX/

Linux

NetBeans/Tools/Options/Java/JavaFX/

Create the Project

Create a new project in NetBeans.

Project informations

Projecttyp: Java FX FXML Application

Name: JavaFXClock

FXML name: Clock

Package structure

javafxclock/controller

javafxclock/model

javafxclock/style

javafxclock/util

javafxclock/view

The backend has these classes

- Time
- TimeUnit
- ClockController

TimeUnit

```
private int max;  
IntegerProperty value = new SimpleIntegerProperty(0);  
public void increment(); public void decrement();
```

Time

Connects the TimeUnit

- `private TimeUnit hour, minute, second;`
- `ChangeListener` for each property in `TimeUnit`
- `void sync();`
- `void tick();`
- `void increment();`
- `void decrement();`

ClockController

Tells the View (FXML) what to display

Create the view

- 1 Label: for time — `timeLabel`
- 2 `HBox`

Create the view

- 1 Label: for time — `timeLabel`
- 2 **HBox**
- 3 Button: Start/Stop — `startStopToggleButton`

Create the view

- 1 Label: for time — `timeLabel`
- 2 **HBox**
- 3 Button: Start/Stop — `startStopToggleButton`
- 4 Button: Alarm — `alarmToggleButton`

Create the view

- 1 Label: for time — `timeLabel`
- 2 **HBox**
- 3 Button: Start/Stop — `startStopToggleButton`
- 4 Button: Alarm — `alarmToggleButton`
- 5 Button: Sync — `syncButton`

Create the view

- 1 Label: for time — `timeLabel`
- 2 **HBox**
- 3 Button: Start/Stop — `startStopToggleButton`
- 4 Button: Alarm — `alarmToggleButton`
- 5 Button: Sync — `syncButton`
- 6 Button: Add Hour — `addHourButton`

Create the view

- 1 Label: for time — `timeLabel`
- 2 **HBox**
- 3 Button: Start/Stop — `startStopToggleButton`
- 4 Button: Alarm — `alarmToggleButton`
- 5 Button: Sync — `syncButton`
- 6 Button: Add Hour — `addHourButton`
- 7 Button: Minus Hour — `minusHourButton`

Create the view

- ❶ Label: for time — `timeLabel`
- ❷ **HBox**
- ❸ Button: Start/Stop — `startStopToggleButton`
- ❹ Button: Alarm — `alarmToggleButton`
- ❺ Button: Sync — `syncButton`
- ❻ Button: Add Hour — `addHourButton`
- ❼ Button: Minus Hour — `minusHourButton`
- ❽ Button: Add Minute — `addMinuteButton`

Create the view

- ❶ Label: for time — `timeLabel`
- ❷ **HBox**
- ❸ Button: Start/Stop — `startStopToggleButton`
- ❹ Button: Alarm — `alarmToggleButton`
- ❺ Button: Sync — `syncButton`
- ❻ Button: Add Hour — `addHourButton`
- ❼ Button: Minus Hour — `minusHourButton`
- ❽ Button: Add Minute — `addMinuteButton`
- ❾ Button: Minus Minute — `minusMinuteButton`

Create the view

- ❶ Label: for time — `timeLabel`
- ❷ **HBox**
- ❸ Button: Start/Stop — `startStopToggleButton`
- ❹ Button: Alarm — `alarmToggleButton`
- ❺ Button: Sync — `syncButton`
- ❻ Button: Add Hour — `addHourButton`
- ❼ Button: Minus Hour — `minusHourButton`
- ❽ Button: Add Minute — `addMinuteButton`
- ❾ Button: Minus Minute — `minusMinuteButton`
- ❿ Button: Add Second — `addSecondButton`

Create the view

- ❶ Label: for time — `timeLabel`
- ❷ **HBox**
- ❸ Button: Start/Stop — `startStopToggleButton`
- ❹ Button: Alarm — `alarmToggleButton`
- ❺ Button: Sync — `syncButton`
- ❻ Button: Add Hour — `addHourButton`
- ❼ Button: Minus Hour — `minusHourButton`
- ❽ Button: Add Minute — `addMinuteButton`
- ❾ Button: Minus Minute — `minusMinuteButton`
- ❿ Button: Add Second — `addSecondButton`
- ⓫ Button: Minus Second — `minusSecondButton`
